WASHUNITS

WATERFALL WITH DIRECT DELIVERY FROM THE MIXER

FOR ANY WASHUNIT EQUIPPED WITH AN ANTI-DRIP FORK

The quick attachment/detachment kit is screwed directly onto the anti-drip fork; this allows you to quickly attach and detach the hand shower or waterfall depending on your need. The waterfall is activated by normally opening the running water from the mixer.

WATERFALL WITH RECIRCULATION SYSTEM

ONLY FOR BRAND NEW VEZZOSI WASHUNITS

Spa Waterfall is the innovative quick connect/release waterfall system that makes the Vezzosi wash basins a hair spa. The water recirculation system allows you to avoid unnecessary waste with consequent savings on water consumption.

The waterfall is activated electronically via the control keyboard which also regulates the footrest and massage.

The sink must be filled to the level of the filter mounted inside the tub.

Always using the same recirculating water, it is possible to add aromas and essences for the treatment.

The waterfall with recirculation cannot be mounted on existing washes but only on new Vezzosi washes that come with the predisposition.

WASHUNITS WITH OZONE

The ozone generator ozones the mains water used to wash hair in hair salons.

Ozone is a gas with a high oxidizing power capable of sanitizing skin and hair. This gas is completely ecological as, after carrying out its oxidizing function, it returns oxygen without leaving harmful residues.

In addition to combating hair loss, ozone leaves hair softer and revives its color and shine. The use of ozonated water also allows you to reduce

the amount of use of shampoo and conditioner. It also reduces seborrhea and improves the condition of hair damaged by dyes, straighteners and bleaches.

The use of ozone is the simplest, most effective and ecological sanitization tool.

has been recognized by the Ministry of Health as a "Natural Presidium for the sterilization of environments contaminated by bacteria, viruses, molds, mites etc.,

in July 1996 Prot.nr.24482

internationally it is recognized by FDS (2001)

and USDA (2002) as a safe and effective protection.
